## Microsoft Azure

## AZURE BACKUP - The reliable and secure way to protect your data

### Lighstream – Solutions Innovator

Lightstream is a Microsoft® Gold Cloud Platform Partner, and combines data networking and systems integration expertise with an extensive cloud practice to create a world-class provider of technology solutions. Lightstream integrates multiple solutions from best-in-class providers into a single, seamless solution with a single point of contact backed by fanatical customer service.

### About AZURE BACKUP

Azure Backup allows you to back up and restore your data in Microsoft Azure. Lightstream has enhanced Azure Backup so it can be integrated with your existing offerings like Commvault or EMC Avamar, into a single backup-as-a-service solution. It replaces or augments your existing on-premises or off-site backup solution with a cloud-based solution that is reliable, secure, and cost-competitive. Azure Backup provides recovery services built on a world-class infrastructure that is scalable, durable, and highly available.

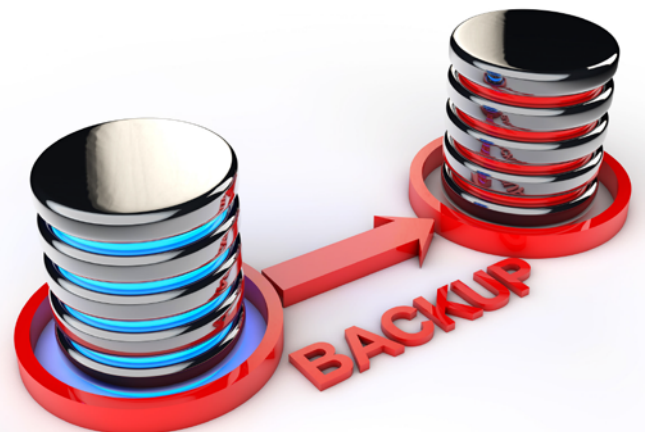

### Benefits of AZURE BACKUP

Azure Backup gives you flexibility with multiple storage options, automatic storage management, unlimited data transfer, scaling, data encryption and a cost-effective long-term retention program that delivers an application-consistent backup solution for your business.
