Gold Cloud Platform

 **Microsoft Azure**

LIGHTSTREAM can help you  
secure your data in AZURE

### **Lightstream – Solutions Innovator**

Lightstream is a Microsoft® Gold Cloud Platform Partner, and combines data networking and systems integration expertise with an extensive cloud practice to create a world-class provider of technology solutions. Lightstream integrates multiple solutions from best-in-class providers into a single, seamless solution with a single point of contact backed by fanatical customer service.

### **SECURITY in AZURE**

Microsoft has made a significant investment in protecting data in Azure. Security is built into the Microsoft Cloud from the ground up, starting with the Security Development Lifecycle, a mandatory development process that embeds security requirements into every phase of the development process. Lightstream can help you ensure that your data as well as your Azure environment are protected at the physical, network, host, and application layers.

### **WHY LIGHTSTREAM?**

Lightstream offers a full complement of security solutions for AZURE, customized to meet the many security needs of enterprises with application workloads in the cloud. Our AZURE security solutions are constantly evolving and updating to address the latest global threats. We can also understand how to get the most out of the security features already built into the AZURE and Microsoft's Security Development Lifecycle.
