

## ABOUT LIGHTSTREAM CONNECT

**Lightstream Connect™** is a web-based *cloud* and *telecom* analytics tool that is tightly integrated with all of the major providers and allows you to optimize your technology spend from one place.

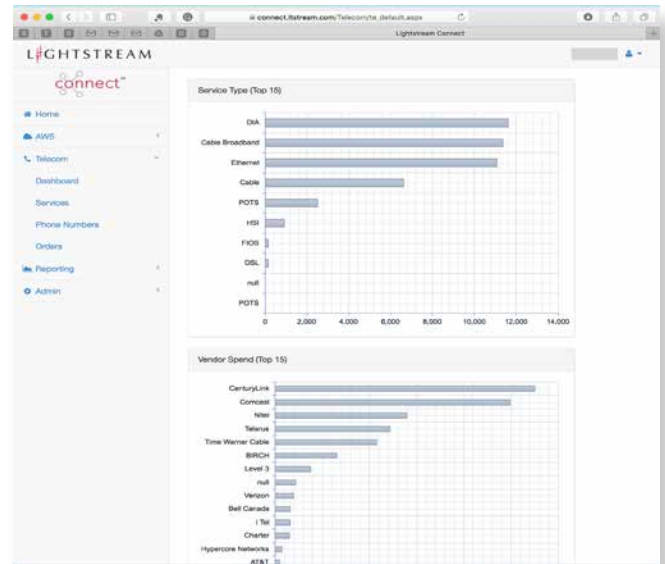

## FOR TELECOM

**Lightstream Connect™** displays an all-inclusive list of all your telecom orders and installed services including circuit ID, location, order status, monthly charges, expiration dates and custom billing tags and monitoring statistics.

## FOR CLOUD

**Lightstream Connect™** gives you a detailed breakdown of your AZURE and AWS spends with account summaries and cost analysis that provides vital information about your entire cloud inventory, utilization and monthly recurring charges. You can see, analyze and download reports about your entire cloud infrastructure from one unified console.

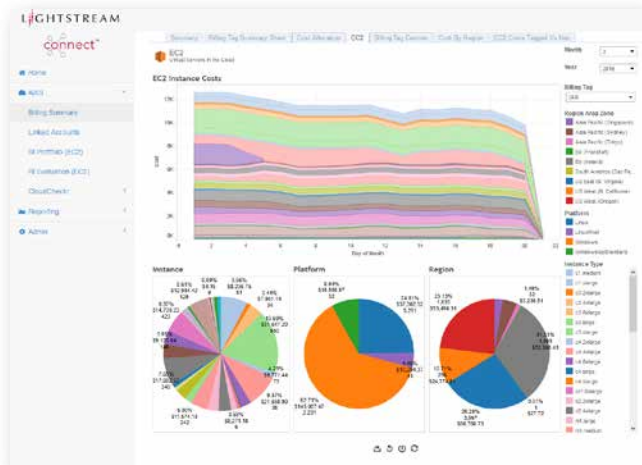

SUPPORTED CLOUDS

Lightstream Connect gives you a complete view of your telecom orders and spend.

View detailed graphs and reports showing how your cloud resources are allocated.

Lightstream Connect supports custom tagging for cost allocation.
